Allowable Subject Matter

1. Claims 1-12, 15-22, 24, 25 and 27-31 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, neither anticipates nor renders obvious the following limitations as claimed:

[Claim 1]: A method of calibrating a digital camera comprising sequentially illuminating a plurality of lights arranged circumferentially about a white light transmissive plate, each of a different wavelength; measuring the intensity of each of said lights; and using said measurements to calibrate said digital camera for the ambient light conditions. Claims 2-11 and 31 depend from claim 1.

[Claim 12]: A computer readable medium for storing computer instructions that, when executed on a computer, enable a processor-based system to: sequentially illuminate a plurality of lights arranged circumferentially, each of a different wavelength; automatically measure the ambient white light intensity of each of said lights in response to a request for calibration; and automatically cause measurements of the white light intensity to be taken in response to the detection of a change in ambient light conditions; and calibrate said digital camera for the ambient lighting conditions using said measurements.

[Claims 19 and 24]: In regards to claims 19-22, 24, 25, and 27-30 23 the prior art of record does not disclose nor fairly suggest a portable device for calibrating a digital camera for varying ambient light conditions as claimed in claim 19 wherein the housing includes two slidably connecting housing portions, one of the portions including a white surface and the other of the
